# Citizens Property Insurance Corporation

## Senior Internal Auditor – Analytics

***Note: This position may be located in Jacksonville or Tallahassee.***

Searching for a place to make your mark? At Citizens, we're interested in building a workforce of top achievers committed to our company's success – and their own. Our company values the knowledge that comes from experienced individuals with a variety of backgrounds, in or out of insurance.

Citizens is a unique government entity with a critical public purpose: a not-for-profit, tax-exempt government entity that is one of the largest property insurance writers in the country that provides State of Florida policyholders unable to find coverage in the private market with property insurance protection.

Citizens Property Insurance has a unique opportunity within a newly created unit to profile and identify abnormal behaviors utilizing internal data analytics and fraud technology. This position also conducts data mining and analysis to detect aberrancies/outliers using Citizens data.

## Desired Skills & Experience

Requirements for this critical position include:

- Bachelor's degree in Business Administration, Accounting, or a related professional field, or combination of related education and experience relevant to position equivalent to 4 years in college
- Active/Certified Information Systems Auditor (CISA)/other relevant Information Systems certification
- 7 or more years of experience relevant to position, to include 3 or more years of data analytics, data warehousing, or data mining experience

The successful candidate will also have project management skills, strong interpersonal, oral, and written communication and consultative skills, as well as the ability to interpret/apply applicable laws, rules, regulations, policies and procedures, and complex/voluminous evidence.

The preferred candidate will be a Certified Internal Auditor (CIA) and/or Certified Public Accountant (CPA) and/or Certified Fraud Examiner (CFE).
