Attribute Standards

Standards 1000–1010

1000 – Purpose, Authority, and Responsibility

The purpose, authority, and responsibility of the internal audit activity must be formally defined in an internal audit charter, consistent with the Definition of Internal Auditing, the Code of Ethics, and the *Standards*. The chief audit executive must periodically review the internal audit charter and present it to senior management and the board for approval.

Interpretation:

The internal audit charter is a formal document that defines the internal audit activity's purpose, authority, and responsibility. The internal audit charter establishes the internal audit activity's position within the organization; authorizes access to records, personnel, and physical properties relevant to the performance of engagements; and defines the scope of internal audit activities. Final approval of the internal audit charter resides with the board.

1000.A1 – The nature of assurance services provided to the organization must be defined in the internal audit charter. If assurances are to be provided to parties outside the organization, the nature of these assurances must also be defined in the internal audit charter.

1000.C1 – The nature of consulting services must be defined in the internal audit charter.

1010 – Recognition of the Definition of Internal Auditing, the Code of Ethics, and the *Standards* in the Internal Audit Charter

The mandatory nature of the Definition of Internal Auditing, the Code of Ethics, and the *Standards* must be recognized in the

Practice Advisory 1000-1 –
Internal Audit Charter, p. 45

Performance Standards

2000 – Managing the Internal Audit Activity

The chief audit executive must effectively manage the internal audit activity to ensure it adds value to the organization.

Interpretation:

The internal audit activity is effectively managed when:

- *The results of the internal audit activity’s work achieve the purpose and responsibility included in the internal audit charter;*
- *The internal audit activity conforms with the Definition of Internal Auditing and the Standards; and*
- *The individuals who are part of the internal audit activity demonstrate conformance with the Code of Ethics and the Standards.*

2010 – Planning

The chief audit executive must establish risk-based plans to determine the priorities of the internal audit activity, consistent with the organization’s goals.

Interpretation:

The chief audit executive is responsible for developing a risk-based plan. The chief audit executive takes into account the organization’s risk management framework, including using risk appetite levels set by management for the different activities or parts of the organization. If a framework does not exist, the chief audit executive uses his / her own judgment of risks after consultation with senior management and the board.

and Exposures, p. 93

Internal Audit Charter

1. Providing a formal, written internal audit charter is critical in managing the internal audit activity. The internal audit charter provides a recognized statement for review and acceptance by management and for approval, as documented in the minutes, by the board. It also facilitates a periodic assessment of the adequacy of the internal audit activity's purpose, authority, and responsibility, which establishes the role of the internal audit activity. If a question should arise, the internal audit charter provides a formal, written agreement with management and the board about the organization's internal audit activity.
2. The chief audit executive (CAE) is responsible for periodically assessing whether the internal audit activity's purpose, authority, and responsibility, as defined in the internal audit charter, continue to be adequate to enable the activity to accomplish its objectives. The CAE is also responsible for communicating the result of this assessment to senior management and the board.

Issued: January 2009

Primary Related Standard

1000 – Purpose, Authority, and Responsibility

The purpose, authority, and responsibility of the internal audit activity must be formally defined in an internal audit charter, consistent with the Definition of Internal Auditing, the Code of Ethics, and the *Standards*. The chief audit executive must periodically review the internal audit charter and present it to senior management and the board for approval.

Interpretation

The internal audit charter is a formal document that defines the internal audit activity's purpose, authority, and responsibility. The internal audit charter establishes the internal audit activity's position within the organization; authorizes access to records, personnel, and physical properties relevant to the performance of engagements; and defines the scope of internal audit activities. Final approval of the internal audit charter resides with the board.

Resource Management

1. The chief audit executive (CAE) is primarily responsible for the sufficiency and management of internal audit resources in a manner that ensures the fulfillment of internal audit's responsibilities, as detailed in the internal audit charter. This includes effective communication of resource needs and reporting of status to senior management and the board. Internal audit resources may include employees, external service providers, financial support, and technology-based audit techniques. Ensuring the adequacy of internal audit resources is ultimately a responsibility of the organization's senior management and board; the CAE should assist them in discharging this responsibility.
2. The skills, capabilities, and technical knowledge of the internal audit staff are to be appropriate for the planned activities. The CAE will conduct a periodic skills assessment or inventory to determine the specific skills required to perform the internal audit activities. The skills assessment is based on and considers the various needs identified in the risk assessment and audit plan. This includes assessments of technical knowledge, language skills, business acumen, fraud detection and prevention competency, and accounting and audit expertise.
3. Internal audit resources need to be sufficient to execute the audit activities in the breadth, depth, and timeliness expected by senior management and the board, as stated in the internal audit charter. Resource planning considerations include the audit universe, relevant risk levels, the internal audit plan, coverage expectations, and an estimate of unanticipated activities.
4. The CAE also ensures that resources are deployed effectively. This includes assigning auditors who are competent and qualified for specific assignments. It also includes developing a resourcing approach

Primary Related Standard

2030 – Resource Management

The chief audit executive must ensure that internal audit resources are appropriate, sufficient, and effectively deployed to achieve the approved plan.

Interpretation

Appropriate refers to the mix of knowledge, skills, and other competencies needed to perform the plan. Sufficient refers to the quantity of resources needed to accomplish the plan. Resources are effectively deployed when they are used in a way that optimizes the achievement of the approved plan.
