Speaker Bio

Margie Bastolla, CIA, is an Orlando-based trainer who helps internal auditors write clear, impactful reports; reduce report revisions; and quicken report issuance. She is author of the 2023 book *Clarity, Impact, Speed: Delivering Audit Reports that Matter, 2nd Edition*, published by The IIA.

Margie has taught thousands of auditors in hundreds of organizations to think critically and write clearly. She also teaches auditors how to build productive, supportive relationships in the workplace. Margie's clients include the Fortune 500, the U.S. military, the international agencies, and many private and public organizations globally. She has worked in over 40 countries.

Before forming her training company, Margie spent 20 years in executive and leadership roles at The Institute of Internal Auditors in Lake Mary, Florida. To learn more about her training, consulting, and executive coaching services, visit www.auditreportwriting.com.

4

5

6

Mistake #2

Assuming they will read the entire report

Correction
Make your reports easy to navigate.

7

Mistake #3

Providing lengthy background information

Correction
Only provide information that adds context.

8

Mistake #4

Skimming the surface

Correction
Identify the root cause.

9

Mistake #5

Writing overly detailed, uninspiring reports

Correction

Write concise, compelling observations.

10

To be compelling, state the risk.

- Describe actual impact.
- Be realistic, not theoretical.
- State likelihood and impact.
- Add relevant content.

11

State Actual Impacts

Not this

During Hurricane Ian, the online payment system shut down due to power outages. As a result, customers abandoned their online shopping carts.

But this

During Hurricane Ian, the online payment shut down for 3.5 hours due to power outages. As a result, 1,200 customers abandoned their online shopping carts and never completed \$163,000 in purchases.

12

Add Realistic, Relevant Content

Not this (circular logic; undefined)
 Without two-factor authentication of wire transfers, the department is not compliant with its wire transfer policy. Also, the company's financial assets are not properly safeguarded and could be misappropriated.

But this
 Without two-factor authentication of wire transfers, the company can process erroneous or illegitimate payments. **(realistic)** The Wire Transfer Department processes 140 wires/day averaging \$8,200/wire. **(relevant)**

13

Mistake #6

Using insider language

Correction
 Use everyday business language.

14

Mistake #7

Thinking that pretty reports wow

Correction
 Focus on clear, precise messaging.

15

Generic messages force readers to develop their own conclusions.

16

Process Challenges

Knowledge Gaps	Delays
<ul style="list-style-type: none"> • Observation development • Writing quality • Reviewing vs. editing • Amount of detail 	<ul style="list-style-type: none"> • Writing observations • Sharing <u>written</u> observations w/ clients • Obtaining consensus & action plans • Reviewing & editing

17

Helping Your Team

- Help team members think through the observation.
- Host content challenge meetings
- Review, don't edit.
- Train everyone on reporting essentials.

18

Agile Reporting Process

Auditors

- Write observations when found
- Use preliminary documents
- Meet with client weekly to:
 - ✓ Discuss and validate observations
 - ✓ Obtain consensus
 - ✓ Propose solutions and action plans

Audit Management

- Reviews preliminary documents throughout the audit

19

Agile Reports

- Continue to evolve
- Some say reports are like the old ones, but with better content
- Case studies
 - ✓ One user issues an ES only
 - ✓ One user issues ES in body of an email; attaches observations in PDF
 - ✓ One user highlights well-controlled risks in ES

20

Exhibit 4-12 – Executive Summary Example - Leading Oil and Gas Construction Company

Section I: Executive Summary

Background
Identity and Access Management (IAM) P&P govern the issuance and management of digital identities so that only authorized users have access to sensitive business applications, information, & operating environments.

The objectives of the audit are to ensure:

- IAM P&P are defined, documented, & communicated for all key functions.
- IAM processes are integrated into HR services, policies, & compliance.
- Information assets are protected from unauthorized access.
- The logical access security controls in place are designed, implemented, & operating effectively.
- Access rights are appropriate & re-certified periodically.

The scope for the audit includes the following activities:

- Evaluate IAM policy/procedures adequacy & compliance level.
- Analyze the design & operating effectiveness of access security controls in IT systems.
- Review the process of user identity access provision/de-provision.
- Review the process of user identity & account administration & management.

#	Title	Risk Rating
1	Weak Password Settings on Active Directory Domain	High
2	Missing Approvals for User Access to SAP Application	High
3	Generic Users Accounts Remain Open in SAP Application	High
4	Annual Access Review not performed to detect dormant user accounts or users with excess privileges	Medium

Report Rating and Classification
This report has been rated as marginally unsatisfactory. The audit results shows significant weaknesses in security settings, user access provision, SAP user accounts, & user access review.

THINK THINGS THROUGH
25 Questions to Report-Writing Excellence

Condition

1. Does the condition describe "the world as it is"?
2. Is the condition opposite the criteria?
3. Does the condition infer risk?
4. Can the reader tell that something is wrong?
5. Is the condition objective and factual?
6. Can the condition be quantified?
7. Does the condition describe the problem in terms of yesterday and today?
8. If needed, is brief background information included?
