## OVERARCHING THEMES

### The Triple Squeeze

Pressure from high inflation, scarce and expensive talent, and global supply constraints.

### Re-Nationalization

Uprooting assumptions of reliance on a global, just-in-time market. Shifting towards different regional and local business.

### Rethinking Resilience

As the pace of uprooting events increases, organizations need to evaluate their fragility and implement resilience measures for long-term thinking.

## NEXT STEPS

1. Benchmark your audit plan for appropriate coverage
2. Educate Audit Committee
3. Drive team discussions
4. Assess key risks
