## 2022 November Luncheon: Third Party Risk Management – Incident Response

The Seattle IIA is excited to have you join us on November 17, 2022 for a presentation by Joe Veroneau!

As organizations continue to adopt cloud software and rely on third parties to support their critical business processes, sensitive data is in more places than ever. This means an incident/breach at one of your suppliers can have a direct impact on your data as well. There is more guidance than ever on the components of effective supplier incident management. In this session we'll discuss proactive and reactive strategies to get a better handle on third party breach preparedness and response.

The learning objectives for this session are:
- Identifying if a supplier has reasonable incident management policies/procedures in place
- Responding efficiently when a supplier may have been involved with a breach
- Strategies and considerations for managing 4th party risk and dependencies

**Joe Veroneau** is the Director of Trust and Security at Conveyor, a software startup focused on helping buyers and sellers of cloud software complete security reviews more efficiently without compromising on quality. Joe has deep experience with information security frameworks and methodologies, having managed security programs that align with the SOC 2 Trust Services, ISO 27001/27002, and HITRUST. He also has numerous years of experience supporting the successful rollout of GRC/ERM software at companies large and small in an advisory capacity.
